

Vehicle Service AI Assistant - Test Document

Vehicle: Honda Civic (2021 model). This document contains sample maintenance information for testing the Vehicle Service AI Assistant.

Service Item	Recommended Service
Engine Oil	Change engine oil every 10,000 km or according to the manufacturer's schedule.
Brake Pads	Inspect brake pads every 15,000 km and replace them if worn.
Tire Pressure	Check tire pressure monthly and before long trips.
Battery	Inspect battery condition every 6 months and clean the terminals if necessary.
Air Filter	Inspect the air filter every 10,000 km and replace it when dirty.

Summary: Regular maintenance helps keep the Honda Civic reliable and safe. Pay special attention to engine oil, brakes, tires, battery, and air filters.
